Interactive Banking Solution

Delight the experience with intelligence

Interactive Banking Solution

Delight the experience with intelligence

One-Stop Branching Services

With our intelligent interactive platform, GRGHub, businesses can promote a variety of retail business solutions. Customers can experience a variation of financial services such as investment and wealth management, credit card applications, consumer credits, and auto financing to optimize customer experience and maximize service efficiency.

Lighter Branches

Introducing the advanced smart branch that defies the traditional banking service workflow by bidding farewell to the "inferior" traditional bank image and turning into innovative branches that provide customers with face-to-face, one-stop interactive communication experiences.

Borderless Branches

The wealth management system can clearly and intuitively display solutions according to your customer's needs. If you encounter a complex problem that cannot be solved at your branch, you can use our single click real-time connection service to remotely consult experts and investment consultant teams to receive customized feedback for your customers.

Innovative banking solutions are composed of the GRGHub installed with customized systems, which offers banks a more interactive way to improve their banking services. Through our one-stop GRGHub terminal, financial institutions can easily communicate and interact with their customers directly making the user experience more convenient and efficient. Through our innovative banking solutions and GRGBanking's biometrics solutions, institutions can accurately identify their customers while also providing the most suitable tailored products and services.

Queuing System

Providing an interactive platform for customers to use while waiting for their turn at branch lobbies.

Information Release

Latest product information and promotions are released in real time through the system.

Remote Assistance

Interact with long distance experts and partners to give customers professional and immediate advice for their financial investments.

Marketing Interaction

Interacting with customers to provide a platform for promoting services that are in demand.

Biometrics Solution

Authenticate your customer's identity in a fast, secure and more convenient manner. This solution can be integrated with VIP services and queuing management.
